

# Safety Minute: Hazardous Materials Transport

## Commonly transported research materials

- Chemicals
- Biological materials
- Radioactive materials
- Compressed gases
- Dry ice
- Lithium batteries

Shipment of hazardous materials must meet regulatory requirements. Failure to do so may result in citations, fines, or imprisonment.

## Transporting materials within the university

- Within or between buildings use secondary containment

## Transporting materials outside the university

- Have known chemical quantities, SDS, and additional details specific to your chemical on hand
- Consult with EHS to complete any materials transfer documentation
- Plan ahead
- Package your materials
- Use a certified shipper
